GRAMMAR

The internet has resulted in a huge change in the English language we use in everyday life. A lot of words have become abbreviated (shortened) due to the ease of using these shortened words. For example;

- LOL = Laugh Out Loud (when something is funny)
- OMG = Oh my God!
- IDK = I Don't Know
- TTYL = Talk To You Later and many more!

Discussion

Do you remember the first time you used the internet?

Do you do any online shopping?

What do you buy online?

What social media platforms do you use?

HOMework

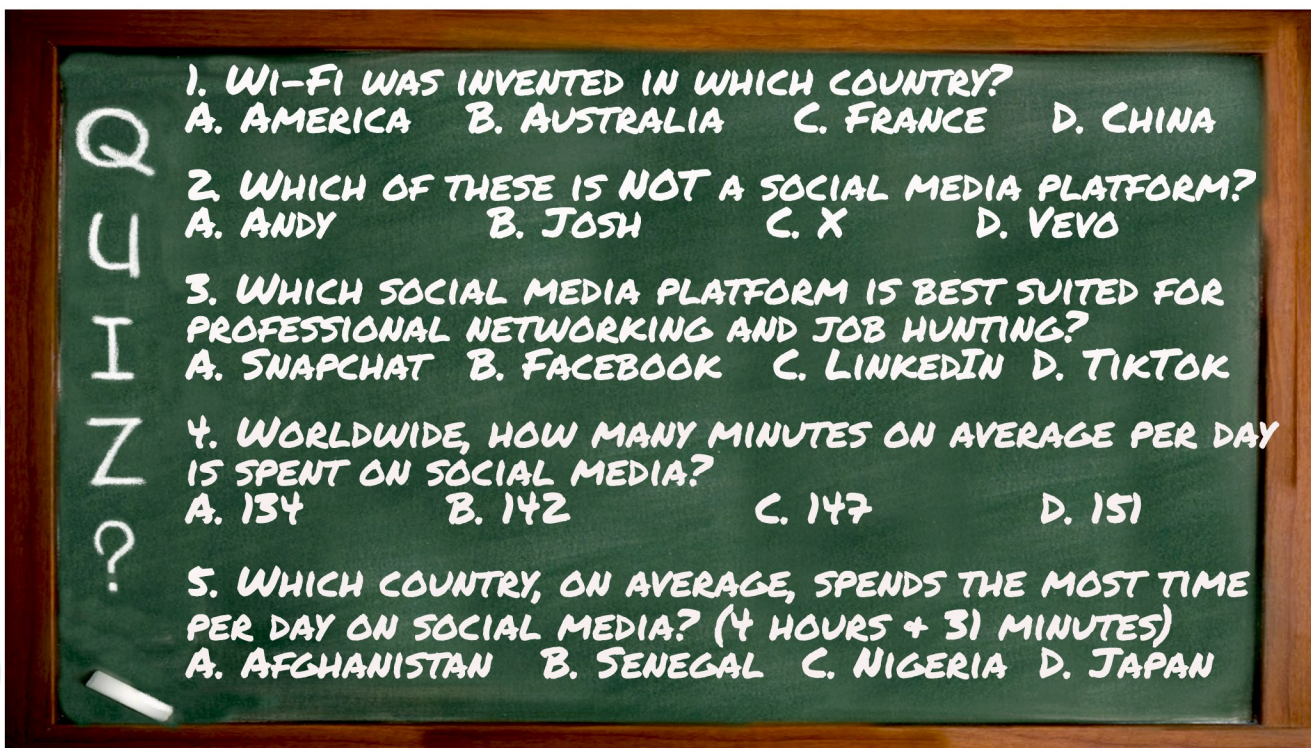

Read this passage and answer the questions below.

The internet is a platform for sharing information. It's the quickest way to exchange data. Information moves thousands of kilometres via the internet. It's a great way to share knowledge, images, files, music, and films. Computers, laptops, and mobile phones are used to access the internet. Everything has become a lot more accessible and cost-saving.

Emails and text are the easiest ways of correspondence on the web. We can send emails instantly to anywhere for free. Along with sharing information, the internet collects information regarding any topic from various websites. It has made lives easier for students, working professionals, and people at home.

Almost all businesses are run online today. We all are dependent on the internet, but at the same time, it is also addictive in nature. There is a high chance that kids might get addicted to the internet, and therefore, it is essential to keep an eye on the kids. Nowadays, it is impossible to pass school life without the use of the internet, but at the same time, we must also be a little careful when our children overuse it.
